

## Make sure you get the fastest response to your prior authorization requests with Cite® AutoAuth

- Immediate approval or pend status of an authorization
- No initial phone call or fax necessary
- Ability to upload clinical information to support request for authorization

Health partners often need a fast response to prior authorization requests. But calling in or faxing a prior authorization request can take time – time that could be better used by starting approved treatments.

Cite AutoAuth provides the fastest response to your prior authorization request. Health partners simply enter clinical criteria within Cite AutoAuth to request prior authorization of services. A determination is then made based on the clinical criteria that has been selected – in many cases, within seconds! After you get the prior authorization approval, you can begin treatment.

## Unfamiliar with Cite AutoAuth?

**Learn more about using Cite AutoAuth by talking with your health partner representative.**

You can also visit the CareSource® Provider Portal at **CareSource.com**. Click “Provider Portal” under Provider Resources. Log in to the portal and select Prior Authorization. You will find information about Cite AutoAuth and how to get the fastest response to your prior authorization request.
