

NETWORK *Notification*

Notice Date: February 14, 2025
To: CareSource Georgia Medicaid Providers
From: CareSource
Subject: Maintaining Provider Information in GAMMIS

This notification is an update to the [network notification](#) posted on April 7, 2022. Updated information is indicated in **red**.

Summary

This is an important reminder of CareSource's policy, in conjunction with Georgia Department of Community Health (DCH) policy. DCH requires provider information be maintained and updated in the Georgia Medicaid Management Information System (GAMMIS). **This includes delegated providers.**

Impact

Any National Provider Identifier (NPI) or Medicaid ID reported on a claim must be reported to GAMMIS. Claims submitted to CareSource with non-credentialed NPIs (Billing, Attending, Ordering, Referring, Rendering and Prescribing) will be denied. You can enroll providers with Gainwell at <http://www.mmis.georgia.gov>.

Importance

It is important for providers to understand the implications of failing to enroll in Medicaid. If you are a provider described above including physicians, other practitioners and facilities who render services to Medicaid beneficiaries, your claims will not be paid for such items or services unless you enroll in Medicaid and your NPI number is included on the claim submitted to CareSource by the rendering provider.

Questions

If you have questions regarding claim denials, please contact Provider Services at **1-855-202-1058**.
