

CareSource FREE Infant Scales Enhanced Benefit

Watch Me Grow!

At CareSource, we know that some high-risk infants will require ongoing monitoring of their weight for the first weeks or months after discharge. This watchful action can be important for an infant's continued health and well-being. Monitoring a baby's weight is one of the easiest ways to ensure a child is growing at an appropriate rate, and a good indicator for potential health issues. Additionally, this benefit may help prevent unnecessary exposure to pathogens during in-person office visits.

CareSource is pleased to offer home infant scales as an enhanced benefit for our most vulnerable members*

Our providers have cited the need for in-home infant scales to be readily available to families whose infants require ongoing weight monitoring. Easy access to a scale at home provides many benefits such as:

- The ability to conduct routine weight evaluations without leaving home
- Prevention of potential exposure to COVID-19, influenza, and Respiratory Syncytial Virus (RSV)
- Early identification and monitoring of an infant's growth and development
- Enhancing the opportunity to receive objective feedback during a telehealth visit
- Avoiding unnecessary emergency room visits
- Providing peace of mind for mothers and families

To obtain a scale, see if your patient is eligible, and/or get further information, please contact CareSource Member Services Monday through Friday 8 a.m. to 8 p.m. Eastern Time (ET) at **1-844-607-2829**
| TTY: 1-800-743-3333 or 711.

*For those who qualify. Medical necessity is determined by a CareSource nurse.
