Introduction

Your Guide to Best-Cost Options

CareSource provides your prescription benefits. We understand benefits can be confusing and sometimes costly. To help, we have created a drug formulary; a list of drugs used to treat common health conditions. This list is your guide to best-cost options. The drugs are best-cost options because they can provide the same health benefits as more expensive drugs but cost less. Many conditions have treatment options that vary in cost. This list can make it easier for you and your doctor to choose effective, lower-cost drugs first.

Prior Authorizations

CareSource may require health partners to send us information about why a drug or a certain amount of a drug is needed. This is called a prior authorization request. CareSource must approve the request before a member can get the drug. The abbreviation “PA” is used in the Drug Formulary to show that a prior authorization is needed.

Here are some reasons for a prior authorization:

- A generic or alternative drug is available.
- The drug can be misused or abused.
- The drug requires special handling, monitoring or is available from limited shipping locations.
- There are other drugs that must be tried first.

Prior Authorization Requests

Health care partners may make prior authorization requests by phone or fax. Providers, please call **1-855-852-5558** and follow the prompts, or fax to 1-866-930-0019.

If we receive the request before 5 p.m. on Friday, we will give a decision with 24 hours. It may take longer than 24 hours for requests received on weekends and most holidays. We may not approve a prior authorization request for a drug. If we don't, we will send you information about how to appeal our decision.

Quantity Limits on Opioid Analgesics

Therapy with opioid analgesics may have quantity limits based on drug makers' recommended dosing frequencies and/or state regulations.

Tell Us the Medical Reasons for Exceptions

Sometimes a member may have a drug allergy or intolerance or a certain drug may not be effective for a member. The member and provider may decide that a drug that is not listed on the Formulary is a better choice for the member. In these cases, the member or the member's representative may ask for an exception to a drug listed on the Formulary. The member or member's representative may make the request online or by calling Member Services.

To reach Member Services, call **1-833-230-2099** (TTY/TDD: 1-800-648-6056 or 711), Monday through Friday, 7 a.m. to 7 p.m. Eastern Time.

CareSource then contacts the appropriate health partner. CareSource may ask the health partner to provide written clinical documentation about why the member needs an exception. Health partners must provide this information.

CareSource will provide a decision no later than 72 hours after the request is received. If the member is suffering from a serious health condition, CareSource will provide a decision within 24 hours. As part of the process, CareSource will consider whether the requested drug is clinically appropriate.

Typically, our Formulary includes more than one drug for treating a condition. These medicines are called "alternative" drugs. CareSource will generally not approve the request for an exception if an alternative drug would be just as effective as the drug requested and would not cause other health problems.

Using the Drug Formulary

Use the list to check if your current medicines are best-cost options. If not, ask your doctor if a drug on the list is right for you. Also, take the list with you each time you or your family visits a doctor.

PLEASE NOTE: This list is a guide to medicines used to treat common conditions only. It does not include all the drugs covered by your benefit plan. For a complete and updated list, visit CareSource.com/marketplace/KY or call the toll-free number on the back of your benefit ID card.

CareSource Online Formulary Search Tools Available

CareSource has easy-to-use online drug formulary tools that can help you save time by quickly looking up medications to make sure they are covered by CareSource. Also, you can check for generic alternatives, prior authorization requirements, and any restrictions or limits that may apply. To start using the tool, visit CareSource.com, and visit the Pharmacy page of the appropriate line of business, and select Formulary Search Tool. You can also find CareSource policies on CareSource.com Health Partner Policies page.

About Generics

Today, there are many generic drugs to treat short and long-term conditions. It makes sense to try them because, for most people, they work just as well as higher-priced, brand-name drugs but cost less. Why pay more than you have to in order to stay healthy? Are you still unsure if generics are right for you? Consider these facts:

- Lower cost does not mean lower quality. The U.S. Food and Drug Administration (FDA) requires generics to have the same high quality, strength, purity and stability as brand name medicines.
- The research, development and advertising of new medicines cost a lot of money.
- Generics are lower cost because companies that make them don't have to start from scratch. They then pass the savings on to you, the consumer.
- All generics must meet the same FDA standards as brand names. Generic drugs have the same active ingredients and must perform the same as the brand name.
- Choosing a brand drug when there is a generic available may cost you more. When a generic is available and you choose the brand name drug, you may be responsible to pay the cost difference between the two in addition to your copay or coinsurance.

About the Drug Formulary: Drugs are grouped into 2 parts

Part 1 -- Drug Formulary, sorted by which body system or condition they treat, and Part 2 -- Index, sorted by the alphabet, for quick reference.

- Many of the drugs are generics. Consider generics first. They are safe, effective and generally lowest cost.
- Generic medicines are in lowercase italics. For example, *diclofenac*.
- All generics available may not be listed. Generics not listed are still usually your best-cost option and should be considered before brand name drugs.
- If NO generic is available, the most effective and cost-effective brand-name medicine(s) are listed. They should be tried before other higher-cost brand names.
- Brand-name medicines are listed in all CAPs. For example, ENBREL.
- The Formulary can change at any time as new drugs come out and older drugs are available as generics. If a brand name becomes available as a generic, the brand name will no longer be considered a best-cost option. The generic version of that medicine will instead.
- Your actual plan may not cover certain treatments, even if they are on this list.

Part 1 -- Drug Formulary Drugs by body system or condition they commonly treat

Your best-cost options are listed below by body system or condition they commonly treat.

Some drugs may be used to treat other conditions. The list is divided into three columns:

- Column 1 is the drug name. Remember, generics are in lowercase italics and should be considered first.
- Column 2 is the drug's cost-sharing tier. Cost-sharing is the copay (coinsurance) amount you have to pay out-of-pocket for the drug. The tiers are 0, 1, 2, 3, and 4. In general, the copay amount increases as the tier number increase. Tier number 1 has the lowest copay amounts and tier number 4 has the highest. Visit CareSource.com/marketplace or call Member Services at the toll-free number on the back of your ID card to learn about your exact copay amounts.
- Column 3 lists the requirements or limits CareSource has for the medicine. Please review the Legend to learn about each requirement or limit.

Part 2 -- Index (drugs listed alphabetically for quick reference)

You can locate your best-cost options in the Index. Generic and brand names are listed together by the first letter of the medicine name. This list can help you find a drug if you are unsure what body system or condition to look under. If you are unable to find your current drug OR if it is not on this list, visit CareSource.com/marketplace/KY or call the Member Services number on the back of your ID card.

List of Abbreviations

ACA: Affordable Care Act

AR: Age Restriction. For certain drugs, the drug may be covered for members in a certain age range without a prior authorization.

OTC: Over-the-Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
