

PHARMACY POLICY STATEMENT

Georgia Medicaid

DRUG NAME	Palforzia [Peanut (Arachis hypogaea) Allergen Powder-dnfp]
BENEFIT TYPE	Pharmacy
STATUS	Prior Authorization Required

Palforzia, approved by the FDA in 2020, is an oral immunotherapy indicated for the mitigation of allergic reactions, including anaphylaxis, that may occur with accidental exposure to peanut. It is approved for use in patients with a confirmed diagnosis of peanut allergy. Initial Dose Escalation may be administered to patients aged 4 through 17 years. Up-Dosing and Maintenance may be continued in patients 4 years of age and older. Palforzia is not indicated for the emergency treatment of allergic reactions, including anaphylaxis. Peanut allergy is one of the most common food allergies to occur in children and adults. It is commonly associated with anaphylaxis leading to a severe and potentially life-threatening reaction. The standard of care is to adopt a diet that avoids peanuts. However, patients can unknowingly ingest peanuts at any time.

Palforzia [Peanut (Arachis hypogaea) Allergen Powder-dnfp] will be considered for coverage when the following criteria are met:

Peanut Allergy

For **initial** authorization:

1. Member is between 4 and 17 years of age; AND
2. Medication is prescribed by or in consultation by an allergist or immunologist; AND
3. Member has a diagnosis of a peanut allergy confirmed by clinical history of allergic reactions; AND
4. Chart notes document serum IgE > 0.35kUa/L OR Skin Prick Test wheal > 3mm compared to control; AND
5. Provider attests medication will be used concomitantly with a peanut avoidant diet; AND
6. Provider attests that member does **NOT** have any of the following:
 - a. Anaphylaxis in the last 60 days;
 - b. Uncontrolled asthma;
 - c. Eosinophilic esophagitis or other eosinophilic gastrointestinal disease; AND
7. Medication will **NOT** be used with Xolair; AND
8. Provider attests the member has been assessed for ability to comply with daily dosing requirement and can adhere to the daily dosing schedule.
9. **Dosage allowed/Quantity limit:** One initial dose escalation pack (13 capsulues) for 1 day. One up-dosing pack for 2 weeks each x 11 packets. Then, maintenance dose of one 300 mg sachet once daily. Quantity limit: 1 kit (30 sachets) per 30 days after initial loading dose and up-dosing.

If all the above requirements are met, the medication will be approved for 6 months.

For **reauthorization**:

1. If the member is over 17 years of age, therapy must have been initiated between 4-17 years of age; AND
2. Chart notes have been provided to show the member is clinically benefiting from therapy and has NOT had anaphylaxis requiring advanced medical care.

If member meets all the reauthorization requirements above, the medication will be approved for an additional 12 months.

CareSource considers Palforzia [Peanut (*Arachis hypogaea*) Allergen Powder-dnfp] not medically necessary for the treatment of conditions that are not listed in this document. For any other indication, please refer to the Off-Label policy.
